Velociti Series® AMM-4F
Addressable Monitor Module

General
The Gamewell-FCI Velociti® Series, addressable monitor module (AMM-4F) features a single Style D, Class A initiating device circuit. It may also be configured as a Style B, Class B initiating circuit with end-of-line resistor. This module provides an address for any device or group of devices connected to this circuit. Any alarm initiating devices with normally open (N.O.) dry contacts, such as heat detectors, linear heat detection devices, 4-wire projected beam smoke detectors, 4-wire smoke detectors, water flow switches, tamper switches, manual stations, etc. may be installed in this circuit.

The Velociti® Series use a communication protocol that substantially increases the speed of communication between the sensors and certain Gamewell-FCI analog addressable fire alarm controls. These devices operate in a grouped fashion. If one of the devices in the group has a status change, the panel’s microprocessor stops the group poll and concentrates on the single device. The net effect is response speed up to five times greater than earlier designs.

The AMM-4F module is designed for installation in the signaling line circuit of any Gamewell-FCI analog addressable control panel. The initiating circuit of the AMM-4F has a maximum line resistance of 40 ohms, allowing the module to accommodate a number of initiating devices at a distance from the module. The AMM-4F is designed to mount in a 4” square junction box 2 1/8” deep.

The initiating device circuit of the AMM-4F can support a maximum line resistance of up to 40 ohms allowing the use of linear heat detection devices.

Ordering Information
AMM-4F: Addressable monitor module, single circuit Style D, Class A or Style BC/A and B

FEATURES & BENEFITS

• Compact size allows easy installation
• Includes Class A, Style D, or Class B, Style B initiating circuit
• Offers a visual rotary, decimal switch addressing (01-159)
• Provides a 40 ohm line resistance for each initiating device circuit
• Accommodates any N/O dry contact device
• Bi-color LEDs flash green whenever the module is addressed, and light steady red on alarm*

*Note: Only the red LED is operative in panels that do not operate in Velociti® mode.
# Velociti Series® AMM-4F Technical Specifications

## SYSTEM

**Supervisory Current:** 0.000375 amps. (LED flashing)

**Alarm Current:** 0.005 amps. (LED lit)

**Operating Temperature:** 32° to 120° F (0° to 49° C)

**Relative Humidity:** 10 to 93% (non-condensing)

**End-of-Line resistor:** 47K ohms

**Dimensions:** 4 1/2” H x 4” W x 1 1/4” D

(11.4 x 10.2 x 3.2 cm)

## TEMPERATURE AND HUMIDITY RANGES

This system meets NFPA requirements for operation at 0 – 49°C/32 – 120°F and at a relative humidity 93% ± 2% RH (noncondensing) at 32°C ± 2°C (90°F ± 3°F).

However, the useful life of the system’s standby batteries and the electronic components may be adversely affected by extreme temperature ranges and humidity. Therefore, it is recommended that this system and its peripherals be installed in an environment with a normal room temperature of 15 – 27°C/60 – 80°F.

## STANDARDS

The Velociti Series® AMM-4F is designed to comply with the following standard:

**UL Standard:** UL 864 9th Edition

## AGENCY LISTINGS AND APPROVALS

These listings and approvals apply to the modules specified in this document. In some cases, certain modules or applications may not be listed by certain approval agencies, or listing may be in process. Consult factory for latest listing status.

**UL:** S1949

**FM:** 3023594

**MEA FDNY:** 277-03-E Vol. VI

**CSFM:** 7300-1703.0102

**ISO 9001 Certification**
