eVance™ Series Inspection Manager

Description

The Inspection Manager software is an essential part of the eVance™ Services offering. The Inspection Manager dramatically improves the speed, accuracy and efficiency of your testing and inspection activities while providing professionally formatted reports.

Automates Data Collection and Testing

Fire panels connected to the secure data center, with a web portal, transfer test information directly to the application. This connectivity feature omits the need for a technician to monitor the panel when testing. Non-addressable points can be inspected using integrated bar code labels and scanners.

Supports Multiple Technicians

With the Inspection Manager, multiple technicians can conduct the walk test simultaneously. The Inspection Manager provides the capability to sync the walk test results and data across multiple mobile devices.

Works Online and Off line

In the connected mode, the application can pull data from fire panels using web portals for connection to the secure data center. If connectivity to the data center is lost or not possible, the Inspection Manager will operate in a bar code scan mode.

Enables Visual Documentation

Technicians can use their mobile devices to take digital photographs of equipment and areas that require corrective action. Those images are then stored in the secure data center with the inspection data.

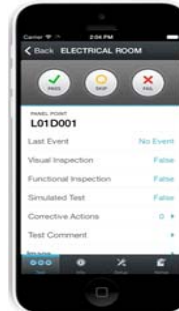

Streamlines Reporting

The Inspection Manager automatically generates professionally formatted reports that can include your business information and logo. Signatures can be captured on the technician's mobile device. Reports can be emailed and stored in the data center with 24/7 access available to the ESD, building owner and/or AHJ.

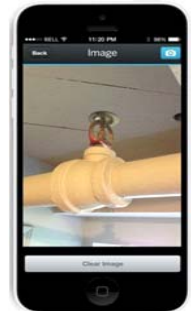

Trademarks:

MENU

PHOTO

Features

Inspection Management Software

- One person walk test on addressable devices when you connect the fire panel to the data center using the web portal.
- Voice recognition commands allow for hands-free operation, which makes testing less cumbersome and up to 30% faster for systems connected to the eVance data center through a web portal.
- The Technician always knows the test status. The test status shows the number of devices tested and the total devices remaining to test.
- Search and sort capability on the Test Item List provides quick and easy viewing of items by test status and description.
- Capture corrective actions using the camera, voice recognition and/or typing the information.

Test Plans

- Technician can easily schedule equipment for quarterly, semi-annual, and/or annual testing.

Test and Inspection Reports

- NFPA 10, NFPA 25, NFPA 72, NFPA 2001, NFPA 72 Record of Completion, Corrective Action, Device Sensitivity, Joint Commission and Facility Equipment Inspection report formats are supported.
- Reports previewed on the mobile device.
- Signatures are captured directly on the mobile device.
- Reports can be e-mailed immediately upon completion.
- Access to reports available 24/7 via the data center.

End User / Building Owner Information Center

- Capability to access inspection reports for your buildings.

Database Import

- Import addressable device database from CAMWorks™ Tools (versions 2.30 - or later).

System Requirements and Accessories

- **Required Mobile Devices (Customer-supplied):**
 - Apple iPhone 5/5s, iPod touch, or iPod mini (iOS7) or
 - Android (KitKat OS v. 4.4 and later).
- **GW-WEBPORTAL:** Web portal that connects the Gamewell-FCI fire panels to the secure data center. See GW-WEBPORTAL Data Sheet, P/N:9021-60802.
- **Required Scanners (Purchased directly from Gamewell-FCI):**
 - For Apple mobile devices: SCANNER-5 (iPhone 5/5S), SCANNER-TOUCH (iPod touch), or SCANNER-MINI (iPad mini). See Data Sheet P/N:9021-60808.
 - For Android mobile devices: SCANNER-BT. See Data Sheet P/N:9021-60841.
- **BARCODE-1000:** Roll of 1,000 bar code labels. bar code labels may be purchased from Gamewell-FCI or printed by the customer.
- **Bluetooth Headset:** Bluetooth is optional for the Inspection Manager and is provided by the customer. Recommended headsets are the Plantronics® Voyager Legend (P/N:87300-01) and the Jawbone ERA™.

Data Security and Privacy

Hosted / Secure Data Center

The secure/hosted data center is located in the United States and is compliant with the following standards:

- SSAE 16 & ISAE 3402 audit standards (formerly SAS 70).
- The SOC 3 SysTrust® for Service Organizations Seal of Assurance.

These certifications are governed by industry and government regulations, and speak to critical aspects of our data center - physical access, network and IP backbone access, system availability, customer provisioning and problem management. The data center provides regular backups and offsite storage of your critical data.

Data Ownership and Privacy

Because your company and customer data is of utmost importance, our subscription and privacy agreement is in place to protect your business. To view the subscription and privacy agreement, please go to:

<http://evanceservices.honeywell.com/Pages/agreement.aspx>

Software Licensing

The Inspection Manager software is purchased as an annual license. The license you need is based on the number of people who will be using the software at your company. Any building owners, end-users, AHJ's (customers) that your company provides view-only access to do not count as a user in terms of the license agreement.

After you purchase the Inspection Manager application and create user names and passwords from the web-based software application, you can download the eVance Services Inspection Manager from the Apple App Store.

As part of the eVance Services offering, the Inspection Manager software may be bundled with the Service Manager software at a discount over purchasing the two software applications separately.

Yearly License Renewals

At month 9 of the yearly license, you will start to receive e-mail messages and warnings from the data center that your license will run out in 3 months. You should then order a renewal license.

Software License Upgrades

- License upgrades can be purchased when you want to add more users or another license
- As an example, this would allow you to go from a 5 user license to a 10 user license, or to add Service Manager if you are currently using Inspection Manager.
- Upgrade orders should be placed within 9 months after the yearly license period has started. After month 9, the data center will treat an eVance Services software license order as a renewal.

GAMEWELL-FCI
